

# Erick Erraez

Full Stack Developer

## ABOUT ME

Full Stack Developer with the precision of a stoppage-time goal and the strategy of a WWE main event match.

My code is as clean as my passion for learning languages and as dynamic as a football match. Between debugging and designing, I find myself debating whether a football classic is more thrilling or the main event of WrestleMania. In development and in sports, I'm always looking for the next big win.
